COVID-19 Vaccine in Vermont

Get the latest information on [COVID-19 vaccination in Vermont](#), including who can get the vaccine now and who will be eligible next. Check back often as we update this page regularly with new information.

While we wait for vaccine to become more widely available to Vermonters, we must keep up our prevention practices, including physical distancing, mask-wearing, handwashing and staying home when we’re sick. This is still the best protection from getting and spreading COVID-19.

The [COVID-19 Vaccine Dashboard](#) will be updated daily starting tomorrow.

Learn more about how Health Department data analysts create the map of town level data in the latest [Weekly Data Summary Spotlight](#).

If you gathered with others, get tested

If you gathered with anyone you don’t live with or had a potential exposure to someone with COVID-19, we recommend getting tested. This is how you can help keep the virus from spreading.

Vermonters without COVID symptoms can now get tested at more than 15 regular locations throughout the state, and more of them are now open daily. Many sites now allow you to take a sample yourself, using a short swab in your nose. It’s quick, easy and free.

Register for a test by visiting healthvermont.gov/covid19testing. (You will need to create an account to register.)

If you have symptoms of COVID-19, please contact your health care provider so they can refer you for testing. If you don't have a provider, you can call 2-1-1.
